## Binary Compression 79 5.0.1.1 (Latest)

**Binary Image Compression**

- The art of modeling image source
  - Image pixels are NOT independent events
- **Run length coding of binary and graphic images**
  - Applications: BMP, TIF/TIFF
- **Lempel-Ziv coding\***
  - How does the idea of building a dictionary can achieve data compression?

## Binary Compression 79 5.0.1.1 (Latest)

79 1. What is the new Binary Compression tool from mar.exe? Binary Compression is a command line win32 compression/decompression tool mar.exe and the full source code program listing mar.cpp. The package includes 7991.exe that is a fast encryption tool using password.txt and default filename to encrypt: cin.txt. Binary Compression offers: Both compression and decompression of binary files. Compresses almost any files (bzip2, compress, 7-zip, tar, zip, etc.). Faster (with 5 to 20 times faster), produces smaller, and cleaner compressed files than competing products. Compresses almost any files (bzip2, compress, 7-zip, tar, zip, etc.). Fast : Fast. Compresses faster than most other compression tools. : Fast. Compresses faster than most other compression tools. Can be used as a fast and stable replacement for command line 7-Zip to compress and decompress any file. Can be used as a fast and stable replacement for command line 7-Zip to compress and decompress any file. Full control of the compression process. Full control of the compression process. Unlimited input and output files. Unlimited input and output files. Full Unicode support. Full Unicode support. Can produce the same compressed files as command line 7-zip. Can produce the same compressed files as command line 7-zip. Simple, intuitive command line interface. Simple, intuitive command line interface. An accurate and fast detection of the file format (including the ASCII-compatible format). An accurate and fast detection of the file format (including the ASCII-compatible format). Able to detect whether a file contains ASCII-compatible and non-ASCII-compatible data in the same file. Able to detect whether a file contains ASCII-compatible and non-ASCII-compatible data in the same file. An accurate and fast file decompression. An accurate and fast file decompression. No memory leaks. No memory leaks. Free from viruses. Free from viruses. Supports different formats: bzip2, zip, tar, compress, 7-zip, 7z. Supports different formats: bzip2, zip, tar, compress, 7-zip, 7z. Supports any character set (Unicode support). Supports any character set (Unicode support). Supports single-byte character sets as well as multi-byte character sets. Supports single-byte character sets as well as multi-byte character sets. Supports not only ASCII, but also any other UNICODE characters and Unicode encoding. Supports not only ASCII, but also any other UNICODE characters and Unicode encoding. Advanced filtering options for the compression/decomp
